## SDS statement for Education Technology products

TI Education Technology products, including accessories are considered to be consumer products and articles as defined in the Consumer Product Safety Act (15 U.S.C. 2051 et seq.) and OSHA 29 CFR 1910.1200( c ). As such they are exempt from the MSDS requirements of OSHA 29 CFR 1910.1200. Therefore, MSDS's are not required for these products.

Material Safety Data Sheets (MSDS) are a sub-requirement of the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard, 29 CFR Subpart 1910.1200. This Hazard Communication Standard does not apply to various subcategories including anything defined by OSHA as an "article". OSHA has defined "article" as a manufactured item other than a fluid or particle; (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g. minute or trace amounts of a hazardous chemical, and does not pose a physical hazard or health risk to employees. *Items defined as "articles", are exempt from the requirements of the Hazard Communication Standard; hence a MSDS is not required.*

A handwritten signature in blue ink, appearing to read 'Louis Le'.
